

DMK Ingredients products are made from high quality, German fresh milk. After being collected from our cooperative dairy farmers the milk is processed in state of the art production plants. Like this, we have full control of the origin of our milk, starting from the collection, and guarantee total traceability. Due to our specialized technologies and long term experience, our dairy ingredients are produced especially to meet your and our high standards and requirements. Of course, we are certified for modern food standards and fulfil special nutritional requirements like halal and kosher. Our aim is the ongoing optimization of our dairy-based ingredients and services in order to support you in the development of your products and innovations.

## Professional Solutions for Applications Ice Cream

A creamy mouthfeel, excellent taste and slow melting behaviours are essential for ice cream – one of the world's favourite desserts. Milk and milk products are the key to create premium products. We offer a wide product range depending on your requirements to find the perfect solution for your delicious ice cream.

### A wide range of different product solutions for your application

#### Fresh Dairy (e.g. Skyr, Yoghurt, Cream)

- High protein and low fat levels are characteristics for the traditional product Skyr
- Typical fresh yogurt flavour
- Cream enables a perfectly creamy and smooth mouthfeel

#### Milk Powder (e.g. Agglomerated Skimmed Milk Powder and Buttermilk Powder)

- Low fine dust content for perfect blending properties
- Perfect flowability due to special drying processes
- Buttermilk powder with emulsifying properties and typical fresh dairy flavour

#### Condensed Milk (different qualities, optional with additional additives)

- Evaporated milk for an especially creamy texture and excellent melting behaviour
- Leverages the mouthfeel and optimal melting behaviour
- Optional additives further improve the functionality

### Supply Chain

As part of one of the largest cooperative-based dairy companies in Europe, DMK Ingredients offers a wide range of different packaging systems: from buckets, butter- and cheese-blocks, 25 kg bags, big bags, pallecons to bulk loading-suitable to your needs. As a successful global exporting company we offer a high level of reliability and safety along the complete supply chain.
